INT

CLEANEST ENERGY FOR YOUR HOME...

Alukov[®]
Solar

SOLAR POWER MADE AESTHETIC

PERGOLA SOLAR is a source of clean solar energy for your house. It allows you to reduce electricity consumption from the grid by replacing it with energy from the sun. The Pergola Solar can be operated as an extension to an existing home PV system or work independently. As an added bonus, the roof of the solar pergola and the integrated leads allow for the collection of rainwater for any subsequent use.

PERGOLA SOLAR 10

10 PV PANELS | OUTPUT 3,7 kWp | w 5,5 x h 3,7 m

PERGOLA SOLAR 12

12 PV PANELS | OUTPUT 4,4 kWp | w 6,6 x h 3,7 m

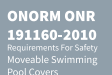

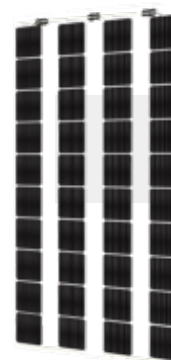

WHY CHOOSE PERGOLA SOLAR?

- Possibility of rainwater collection
- Premium solution
- Design and durable solar canopy
- Precise and clean construction
- Maintenance-free and long life span
- Generation of **3-6 MW of electricity/year** = EU average household consumption = **4 MW/year**
- Reduction of energy costs
- Energy self-sufficiency

IDEAL FOR:

- Customers with an emphasis on quality and aesthetics
- Customers who seek variability
- Customers who need tailor-made products
